

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) Anhydrous, antiperspirant compositions comprising:
 - a. a skin-adhering system comprising:
 - i) a skin-adhering polymer;
 - ii) one or more volatile solvents;
 - b. antiperspirant active;
 - c. thickening agent selected from the group consisting of organic solids, silicone solids, gellants, inorganic particulates, and mixtures thereof; and
 - d. an anhydrous carrierin an amount sufficient to provide antiperspirant efficacy.
2. (Original) The composition of claim 1 wherein the composition comprises
 - a. a skin-adhering system comprising:
 - i) from about 0.1% to about 30%, by weight, of a skin-adhering polymer;
 - ii) from about 0.1 to about 60%, by weight, of one or more volatile solvents;
 - b. from about 0.1 to about 30%, by weight, of an antiperspirant active;
 - c. from about 0.1 to about 35%, by weight, of a thickening agent; and
 - d. from about 10% to about 70%, by weight, of an anhydrous carrier.
3. (Original) The composition of claim 1 wherein the skin-adhering polymer is selected from the group consisting of acrylate polymers/co-polymers, silicone polymers/co-polymers, and mixtures thereof.

4. (Original) The composition of claim 3 wherein the acrylate polymer/co-polymer comprises monomers selected from the group consisting of acrylate monomers, methacrylate monomers, and mixtures thereof.
5. (Original) The composition of claim 3 wherein the silicone polymer/co-polymer comprises copolymers selected from the group consisting of silicone-acrylate copolymers, silicone-urethane copolymers, silicone-maleic anhydride copolymers, silicone resin copolymers, and mixtures thereof.
6. (Original) The composition of claim 1 wherein the skin-adhering polymer has a glass transition temperature (T_g) of from at least about -30°C to about 30°C.
7. (Original) The composition of claim 1 wherein the skin-adhering polymer exhibits film-formation at or above the entanglement molecular weight of the polymer used.
8. (Currently amended) ~~The composition of claim 1~~ Anhydrous, antiperspirant compositions comprising:
 - a. a skin-adhering system comprising:
 - i) a skin-adhering polymer;
 - ii) one or more volatile solvents;
 - b. antiperspirant active;
 - c. thickening agent; and
 - d. an anhydrous carrierin an amount sufficient to provide antiperspirant efficacy, wherein the ratio of the weight percentage of polymer to the weight percentage of the thickening agent is from about 2:1 to about 0.5:1.

9. (Original) The composition of claim 1 wherein the volatile solvent is selected from the group consisting of alcohols, silicone fluids, fluorinated solvents, and mixtures thereof.
10. (Original) The composition of claim 9 wherein the alcohol is selected from the group consisting of ethanol, propanol, isopropanol, and mixtures thereof.
11. (Original) The composition of claim 1 wherein the antiperspirant active is selected from the group consisting of zirconium salts, aluminum salts, and mixtures thereof.
12. (Canceled).
13. (Original) The composition of claim 1 wherein the anhydrous carrier is a cyclic silicone fluid having from at least about 3 silicone atoms to about 7 silicone atoms.
14. (Original) The composition of claim 1 further comprising a pharmaceutical.
15. (Original) The composition of claim 1 further comprising a deodorant agent.
16. (Original) The composition of claim 1 further comprising an antimicrobial.
17. (Canceled).
18. (Canceled).
19. (Canceled).
20. (Canceled).
